EXPERIENCE

Back-End Developer at at Baloot-Cloud (LimooHost), Mashhad *01/2025 - Present*

• I'm currently working as a Backend Developer in the oPing team, focusing on Django and various databases.

• My background in automation, security, and system design helps me approach projects with a broader perspective and improve performance.

• I focus on product development and maintenance while continuously improving my skills to optimize system efficiency and scalability.

Site Reliability Engineer at Baloot-Cloud (LimooHost), Mashhad *12/2023 - 1/2025*

• At LimoHost, I worked on developing internal tools and maintaining high-traffic products, primarily using Python.

• I recognized the importance of design patterns and clean code for scalable applications, so I focused on improving my skills in these areas. I also worked with databases, automation, security enhancements, Git, and Docker.

• I actively collaborated with the team, conducted research, and contributed to improving system efficiency and scalability. These experiences strengthened my expertise in DevOps and infrastructure, particularly in automation, security, and scalable system design.

DevOps Engineer at Greenweb (IranServer), Mashhad *03/2021 - 12/2023*

• Started in hosting support, ensuring server stability and performance, then transitioned to internal operations, focusing on infrastructure, automation, and software development.

• Developed and maintained internal tools, automated tasks with Python and Bash, and worked with Django and Flask for API development. Gained experience with monitoring tools like Zabbix, Prometheus, and Grafana, as well as server configuration and MySQL database management.

• Beyond my core tasks, I independently learned CI/CD, clean code principles, Git, and teamwork. Working under pressure strengthened my time management and problem-solving skills in high-stress environments.

EDUCATION

Bachelor of Computer Engineering, Eqbal Lahoori Institute Of Higher Education, Mashhad *2021 - 2025*

Certifications & Courses

CEH (Certified Ethical Hacker) - *2022*

LPIC 1 - *2023*

Python programming (advanced) - *2022*

SKILLS

Django, Linux, Docker, CI/CD, Problem Solving, Continuous Learning, Team Collaboration, Database Design, AI/RAG

Languages: English (Upper Intermediate), Persian (Native)
